MARKET BREAK DOWN

Pererenan has cemented itself as one of Bali's most dynamic property markets, balancing growth with liquidity. Available supply makes up 10.9% of the total leasehold market, giving buyers more to choose from. Prices have climbed 3.9% over the past year, keeping median values 24% above the market benchmark, a premium that reflects Pererenan's rising status.

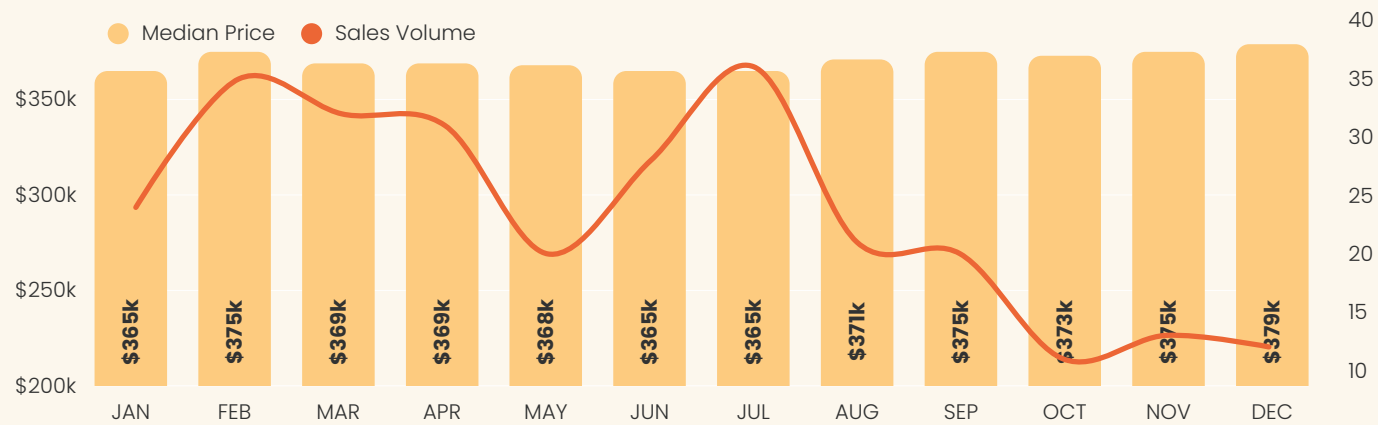

Unlike slower moving areas, Pererenan is turning listings over. A clearance rate of 25% puts it just ahead of the 24% market median, but what really sets it apart is volume, with 293 recorded sales, leading the market. However, rental performance lags behind stronger competitors, with a modest 56% occupancy rate, just 1% above the market average. Investors may see Pererenan's upside in long-term appreciation rather than short-term yields.

PROPERTY SIZE DISTRIBUTION

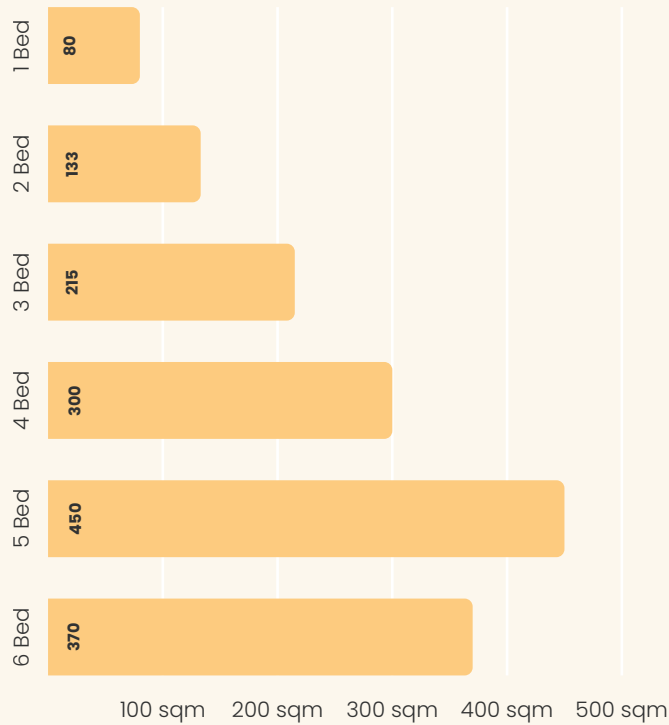

DATA FOR LEASEHOLD VILLAS ONLY

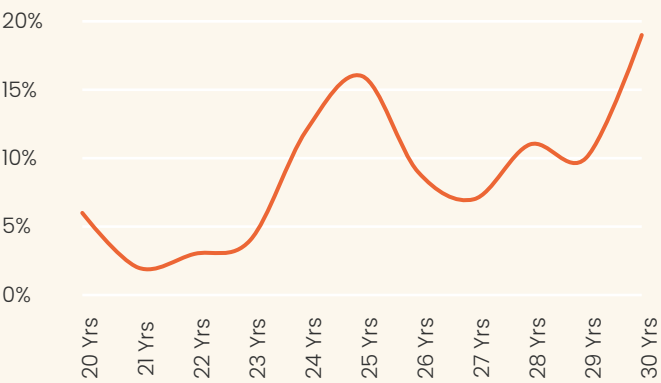

Pererenan’s market isn’t one-size-fits-all. 80% of available properties fall between 1- and 4- bedrooms, offering a broad range of options. Sales are led by 2-bedroom properties (28%) and 3-bedrooms (27%), a pattern that suggests demand remains strong across multiple price points.

Despite this variety, Pererenan’s homes still skew larger than the Bali market average, with the median property 8% bigger. With a healthy mix of supply and steady buyer demand, Pererenan continues to balance high-end appeal with a market that actually moves.
