NEIGHBOURHOOD REPORT

PERERENAN.

2025 ANNUAL

REID

LOCATION

Pererenan
Mengwi
Badung Regency, Bali

MARKET BREAK DOWN

Pererenan in 2025 is a market recalibrating after a period of strong momentum. Transaction prices have softened, the median sits at \$328k, down from \$379k in 2024, and monthly pricing tracked a gradual downward trend through the year, from \$345k in January to \$341k by December. This is not a collapse; it is a correction toward more sustainable levels. The more encouraging signal is in discount rates, which have tightened significantly from a range of -12% to -24% in 2024 to -14.5% to -17.5% in 2025.

Buyers and sellers are converging more efficiently, which is a sign of a market maturing rather than one deteriorating. Supply remains active, with off-plan holding at 20% of stock and apartment inventory growing to 8.3%, indicating continued developer confidence in the location. Pererenan still offers genuine breadth, supply is distributed across 1- to 4-bedroom segments at a range of price points, and remains one of the more liquid markets in Bali. The recalibration of 2025 looks more like a healthy reset than a structural concern.

PROPERTY SIZE DISTRIBUTION

DATA FOR LEASEHOLD VILLAS ONLY

Pererenan consistently offers more space per dollar than its peer markets, and 2025 has not changed that. Median sizes remain among the largest in this report: 133 sqm for 2-beds, 217 sqm for 3-beds, and 310 sqm for 4-beds, consistent with 2024 and a reflection of a pipeline maintaining specification rather than compressing to reduce price. Lease terms concentrate at 25 to 30 years, with 30-year leases dominant. Annual pricing scales steeply by bedroom, from \$10k-\$12k for 2-beds to above \$40k for larger stock.

The rental story is the standout positive of the year: average occupancy has improved to 62% in 2025 from 56% in 2024, the largest single-year occupancy gain of any location in Bali, and well above the Bali market average of 54%. Daily rates are more mixed: 1-beds improved from \$93 to \$110, while 2-beds softened from \$136 to \$122 and 3-beds from \$213 to \$190. The occupancy gain is genuine and meaningful; rate softening across mid-range bedrooms tempers the net yield improvement but does not erase it.
