NEIGHBOURHOOD REPORT

UMALAS.

2025 ANNUAL

REID

LOCATION

Umalas
Kuta Utara
Badung Regency, Bali

MARKET BREAK DOWN

Umalas is one of the quieter success stories of the 2025 Bali market. While other locations have seen pricing stabilise or soften, Umalas has posted genuine median price growth, rising to \$363k from \$340k in 2024, tracked consistently through the year from \$343k in January to \$363k by December with no monthly reversals. The discount rate has also improved, narrowing from -12% to -19% in 2024 to -8% to -14% in 2025, meaning sellers are achieving better prices relative to their asking positions.

Leasehold accounts for 90% of stock, villas for 97%, and the off-plan pipeline holds steady at 16.2%, this is not a market undergoing structural change, but one steadily building value within an established framework. The upper percentile price has risen to \$570k from \$535k in 2024, confirming that demand for premium Umalas stock is strengthening alongside the broader market. For buyers who understand the Kuta Utara corridor, Umalas continues to offer a compelling combination of scale, pricing trajectory, and proximity to both Canggu and the airport.

PROPERTY SIZE DISTRIBUTION

DATA FOR LEASEHOLD VILLAS ONLY

Umalas is defined by larger-format product, and 2025 confirms this is unchanged. Median sizes sit at 74 sqm for 1-beds, 140 sqm for 2-beds, 215 sqm for 3-beds, 342 sqm for 4-beds, 450 sqm for 5-beds, and 581 sqm for 6-beds, among the largest in the corridor. Lease distribution concentrates at 30 years. Annual pricing from around \$5k-\$8k for 1-beds to approaching \$40k for 6-bedroom stock requires careful yield modelling against rising purchase prices.

On the rental side, average occupancy has declined to 55% from 60% in 2024, a five-point drop and the sharpest rental occupancy decline of any location in this batch. At 55% it sits marginally above the Bali market average of 54%, but the directional shift is real and material. Daily rates have also softened across most bedroom types. This creates the central tension in the Umalas investment case: strong and improving capital performance on one side, weakening rental returns on the other. Investors should stress-test yield assumptions against current figures, not 2024 benchmarks, before committing.
