NEIGHBOURHOOD REPORT

SANUR.

2025 ANNUAL

REID

LOCATION

Sanur
Denpasar Selatan
Denpasar Regency, Bali

MARKET BREAK DOWN

Sanur occupies a distinct position in the Bali property market: a beachside location with a more measured pace than the Canggu corridor, a higher proportion of freehold tenure than most leasehold markets, and a supply base that remains genuinely constrained. In 2025, leasehold properties account for 84% of stock with villas at 93.8% of inventory, the product profile is tight and consistent.

The most significant structural shift is the development pipeline, which has expanded to 28.7% off-plan from 20% in 2024. That is a meaningful increase for a market of this size and points to renewed developer confidence in Sanur's investment credentials. Median pricing has held at \$331k throughout the year with minimal monthly movement, confirming a stable market rather than a volatile one. The median sits below the 2024 year-end figure of \$330k in terms of annual trajectory, and upper percentile pricing has softened modestly to \$468k, suggesting some pressure at the premium end while the core market holds.

PROPERTY SIZE DISTRIBUTION

DATA FOR LEASEHOLD VILLAS ONLY

Sanur’s property sizes show a notable shift at the 1-bedroom end, with median footprints reducing sharply to 30 sqm from 50 sqm in 2024, the smallest 1-bed median in this report set. Larger types are more consistent: 2-beds at 136 sqm, 3-beds at 180 sqm, 4-beds at 371 sqm. This compression reflects a developer push toward lower-entry, yield-focused product. Lease distribution is heavily concentrated at 30 years. Annual pricing steps from around \$5k for 1-beds to \$25k-\$30k for larger stock.

On the rental side, average occupancy has declined to 59% from 62.8% in 2024, a four-point drop that warrants attention, though at 59% it still sits above the Bali market average of 54%. Daily rates have improved across most segments: 3-beds from \$226 to \$244, 4-beds from \$377 to \$404. The 2025 rental picture is one of rate resilience offsetting occupancy softening, a dynamic investors should factor into yield projections carefully.
